WOW this is the most grounds crew we have had in a long time. Maybe we should start every morning at 9am. Dave Sandvig was busy maintaining the exercise areas in the Nature Park. Lee took some of our crew behind Blue Fox where they spent most of the morning doing some more trimming and cleaning up our trimmings from awhile ago. Took their load to the dumpster and almost filled it. The rest of us spent the morning at the entrance to the Nature Park doing some major trimming and cleanup of low hanging and dead tree limbs. We cut up a huge pile of firewood which Keith and Mike took to the dumpster. Mark brought the chipper down and Mark and Dan chipped up most of our trimmings. We also trimmed up 5 huge dead cactus. We filled 10 of our garbage cans with our cactus cleanup and put most of it in the dumpster. We left the rest of the cactus and Nature Park trimmings for Felix on Tuesday. A Really Huge Thank You for all the work you did today.
